Dr Samarendra Kumar Basu

MBBS, DGO, FIMAMS (GO) FELLOW (IAOG),
Consultant, Senior Gynaecologist and Obstetrician, Trained in Infertility Management, Laparoscopist
Hony Editor, Journal of the Indian Medical Association (JIMA)

This issue is a special supplement on 'Insulin'.

The unique peptide hormone produced by the beta cells of pancreas considered to be the main anabolic hormone of the body and regulates the metabolism of carbohydrates, fat and protein. Low insulin level in the blood effects by promoting wide spread metabolism specially of reserved body fat. Low insulin level leads to diabetes which is one of the four priorities of diseases targeted by world leaders. Diabetes is also relevant to human being and going to be considered a major problem through in the world, India in particular. Thus our motto of this issue is to discuss on Insulin and help the community as far as possible.

As a member of IMA (HQs) we the team of JIMA strongly oppose the undemocratic NMC Bill and we will be by the side of our all India movement under the able leadership with our National President Dr. Ravi Wankhedkar.

At last we are trying our best to reach all members of IMA with JIMA every month. Due to some unavoidable circumstances, I do agree that non availability in some part is a real problem. I can assure that we shall overcome this problem very soon.

Till I request my leaders of IMA (HQs), leaders of State, as well as our leaders of State Branches to inform their members to visit our Website: www.ejima.in.

Long Live IMA!
